California: 25 Community Colleges

California's focus on promoting equity, supporting adult learners, and adopting guided pathways are in direct symmetry with the REACH Collaborative. Twenty community colleges that are involved in a complementary Guided Pathways implementation project are poised to integrate REACH strategies into this work. California's REACH collaborative, a community of practice launched by the Success Center for California Community Colleges, will help colleges implement pathways-based reforms and supports specifically aimed at adult students of color.

Colorado: 13 Community Colleges

Colorado has set clear strategic goals that center adult students of color, such as increasing their credential attainment in STEM and education fields. Colorado's State Board for Community Colleges and Occupational Education (SBCCOE) recently launched a \$5 million program focused on closing racial equity gaps by targeting classroom practices over the next three years. Community College of Aurora's success in closing equity gaps using data, faculty coaches, and professional development to foster inclusive, culturally relevant, and high-quality teaching and instruction serves as a model for all 13 of the state's community colleges participating in the REACH Collaborative. Colorado's robust statewide credit for prior learning policy also positions these colleges well for serving adult learners.

New York: 30 Community Colleges

New York's experience with translating noncredit to credit programs is beneficial to the state's REACH Collaborative work. In addition to participating in Credential As You Go (CAYG), an incremental credentialing initiative supported by a Lumina Foundation grant, the State University of New York (SUNY) administers apprenticeship and workforce development programs that incorporate credit and noncredit pathways to associates degrees. More than half of New York's community colleges, 30 of which are taking part in REACH, are adopting guided pathways with the support of coaches. A commitment to statewide implementation of culturally responsive curriculum will also align with REACH's focus on culturally sustaining practices.

REACH collaborative

Education Strategy Group

North Carolina's efforts to engage and support adult learners and match program offerings with workforce needs will be valuable to its REACH Collaborative work. Through the NC Workforce Credentials initiative, the state uses a research-based process to identify high-value, non-degree credentials that includes validating them with industry leaders. North Carolina's Better Skills Better Jobs program, which aims to recruit more adult students into pathways and connect them with local employers, could also be an asset for the 24 REACH colleges. Racial equity training provided to guided pathways coaches through the NC Student Success Center will be useful in designing pathways for adult students of color.

Virginia's current efforts with noncredit to credit programs and bundled supports align well with aspects of the REACH Collaborative framework. The FastForward program provides short-term training for in-demand industries, allowing for noncredit credentials to be translated into academic credit. The Get Skilled, Get a Job, Get Ahead (G3) initiative, a tuition-free community college program for low- and middle-income students who pursue jobs in high-demand fields, provides wraparound financial assistance to help eligible students. Virginia's participation in the Talent, Innovation, and Equity (TIE) initiative, supported by Lumina Foundation, provides access to research, funding, and

OCCRL Office of Community College **Research and Leadership**

North Carolina: 24 Community Colleges

Texas: 50 Community Colleges

Widespread adoption of guided pathways has occurred across Texas' 50 community college districts as a result of Texas Pathways. This statewide strategy that supports building pathways to high-value credentials will serve as a firm foundation for the state's REACH Collaborative work. The Texas Reskilling and Upskilling through Education (TRUE), which aims to expand certificate and microcredential programs leading to high-demand job fields, particularly for displaced workers, will also be leveraged. Texas community colleges who participated in a recent basic needs assessment with the Hope Center for College, Community, and Justice can use those insights to help inform and guide the creation of bundled supports for adult students of color at REACH colleges.

Virginia: 23 Community Colleges

Essential Elements (Pillars)

Credential Pathways

Identify a **cohort** of states and institutions.

Scale the **curricular** alignment model across non-degree and credit with emphasis on quality and equity criteria.

Provide technical assistance to inform system redesign efforts.

Bundling and Sequencing Supports

Support state systems to better bundle and deliver student supports (academic, financial, and holistic) as part of pathway redesign models.

Enlist local partners to advise and provide technical assistance to support this integration and center equity

Identify partners to help weave in **culturally** sustaining approaches within bundled student success strategies and redesigned pathways.

Emphasis on **dismantling** approaches that contribute to disparate/stratified outcomes.

REACH collaborative

Education Strategy Group

Office of Community College Research and Leadership

Culturally Sustaining

Two percent increase in credential attainment for enrolled Black, Hispanic, and **Native American** ages 25-64 at participating community colleges by 2023

REACH Asset-Mapping

Design

- Purpose: Reflection, Baseline, Prioritizing for • Coaching/TA
- Seven Domains, each with multiple Elements
- Scale
 - Asset
 - Leverageable
 - Minimal
 - Unknown
- Evidence
- Map at the Grantee level and then the College level

Domains

- Policy & Funding •
- **Program Delivery** •
- •
- Data & Reporting •
- Leadership & Governance
- Equity •

Bundle/Sequence Supports for Pathways

Partnerships & Stakeholder Engagement

REACH Asset-Mapping Deliverables

- 1 REACH Collaborative analysis memo
 - High-level takeaways from each domain
 - Strengths
 - Opportunities
 - Areas of Interest
- 6 state-level analysis memos
 - Identifies 2 priority areas for each state
 - State and IHE agreement & disagreement
 - State and Collaborative agreement & disagreement

Interactive Dashboard

REACH Asset-Mapping Strengths

Bundle/Sequence Supports for Pathways

• The Institution intentionally routes students to basic needs

support to address childcare, housing, and food insecurity.

- The Institution intentionally routes adult students to career advising.
- The Institution ensures that emergency aid is easily accessible and consistently awarded to students in need.

Data & Reporting

- The Institution collects Social Security numbers and/or Unique Student IDs in both credit and noncredit enrollments and that is used to track longitudinal outcomes.
- Race, gender, and wage outcomes are collected for credit programs.

Equity

- The Institution has outlined targeted equity goals for specific racial groups in postsecondary outcomes.
- The Institution has publicly announced an explicit focus on improving racial equity gaps in postsecondary outcomes.

REACH collaborative

Leadership & Governance

- The Institution has the **capacity** (staff and resources) and expertise to support building and implementing REACH.
- The Institution has a **record of reform initiatives** targeting adult learners and learners of color, and a demonstrated ability to manage change.

Partnership & Stakeholder Engagement

- The Institution regularly engages with employers to create employer-validated program curricula and increased graduate transitions to the workforce.
- The Institution collaborates with workforce systems to use labor market data to identify highvalue credentials and programs.

Policy & Funding

- The Institution's **priorities** are directly aligned with REACH, and there's an indication the Institution will prioritize RFACH work.
- The Institution has a list of high-wage, high-demand credentials that are based on criteria.

Program Delivery

- The Institution has **identified barriers** to completion for adult students.
- The Institution intentionally uses a mix of active learning instructional delivery methods to meet adult students' needs for most courses.

REACH Asset-Mapping

Opportunities

Bundle/Sequence Supports for Pathways

• The Institution assigns adult-specific (25+) navigators to ensure adult students are supported in a proactive manner along their pathway.

Data & Reporting

- Completer wage information is collected quarterly for 1 year after completion for noncredit enrollments.
- Noncredit postsecondary outcomes are publicly reported through an interactive dashboard where people can easily filter and select information.

Program Delivery

- The Institution's message and marketing materials and curriculum materials (course content and pathway content) are primarily tailored to adult-aged (25+) students.
- The Institution systematically incentivizes (Debt forgiveness, priority registration, grant or scholarships) continued enrollment from non-credit, non-degree credentials to Associates.

REACH Asset-Mapping

Areas of Interest

Equity

• The Institution has launched at least one racial equity initiative which has led to a significant (5% or more) decrease in racial attainment gaps.

Partnerships & Stakeholder Engagement

- The Institution regularly engages with employers to create employer-validated program curricula and increased graduate transitions to the workforce.
- The Institution collaborates with workforce systems to use labor market data to identify high-value credentials and programs.

Policy & Funding

- alignment, and data/reporting.

Program Delivery

- students.

most courses.

• The Institution's priorities are directly aligned with REACH, and there's an indication the Institution will prioritize REACH work. • Federal stimulus funds are dedicated to financially support the following: credentials of value, adult (25+) learners (direct aid), racial equity efforts, bundled supports, non-credit to credit

• The Institution has identified **barriers to completion** for adult

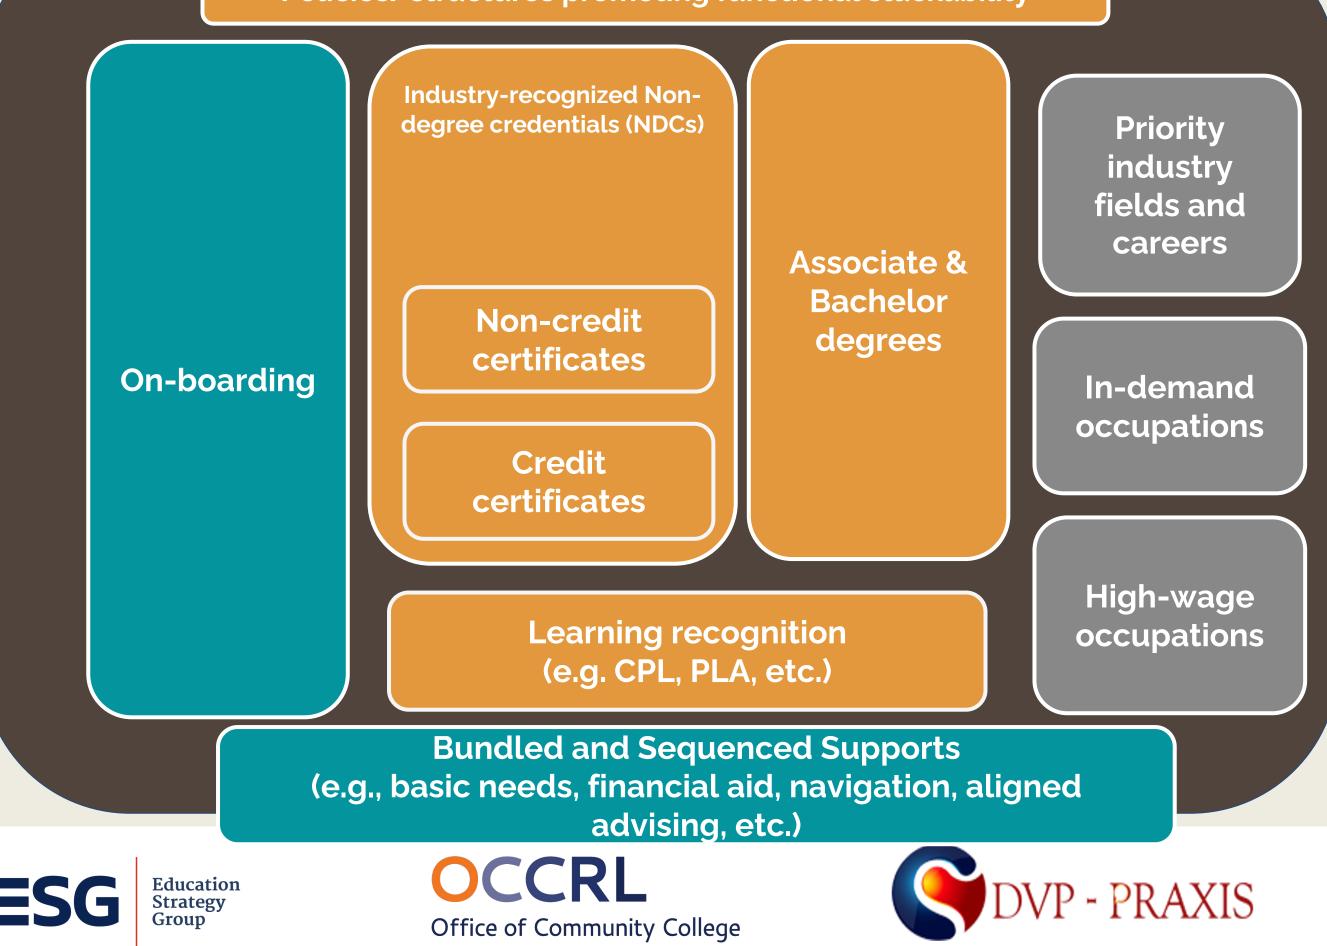

• The Institution intentionally uses a mix of active learning instructional delivery methods to meet adult students' needs for

Research and Leadership

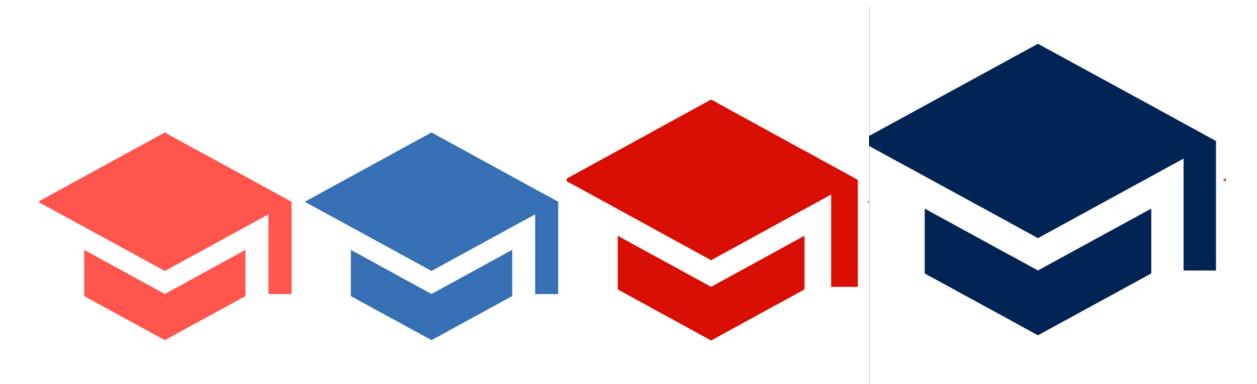

Credential to Degrees Alignment

Making the Case for Alignment

- Reducing susceptibility to economic disruption and displacement
 Educational attainment inversely correlates to unemployment
 - Educational attainment inversely correlates to une for among adults over 25 (Bureau of Labor Statistics, 2020)
- Credentials can serve as a path to economic mobility, when connected to labor market demand
 - Earning potential is further magnified when students earn associate and bachelors degrees

pathways

Create a list of credentials to consider

Create a list of credentials that lead to high-wage occupations*

Create a list of credentials that DO NOT lead to highwage occupations

*Consider using crosswalk from occupation SOC to CIP

What are the indemand industries in your area?

In-demand: Occupations display high rates of projected growth, have a high frequency of job postings, have a high concentration of jobs in the local region, and are aligned with emerging technology.

Does the occupation provide a living or high-wage?

Living-wage: Earn a wage at which a person's basic needs (food, shelter, transportation, healthcare) can be met

High-wage: Earn at least 50% more than the average wage

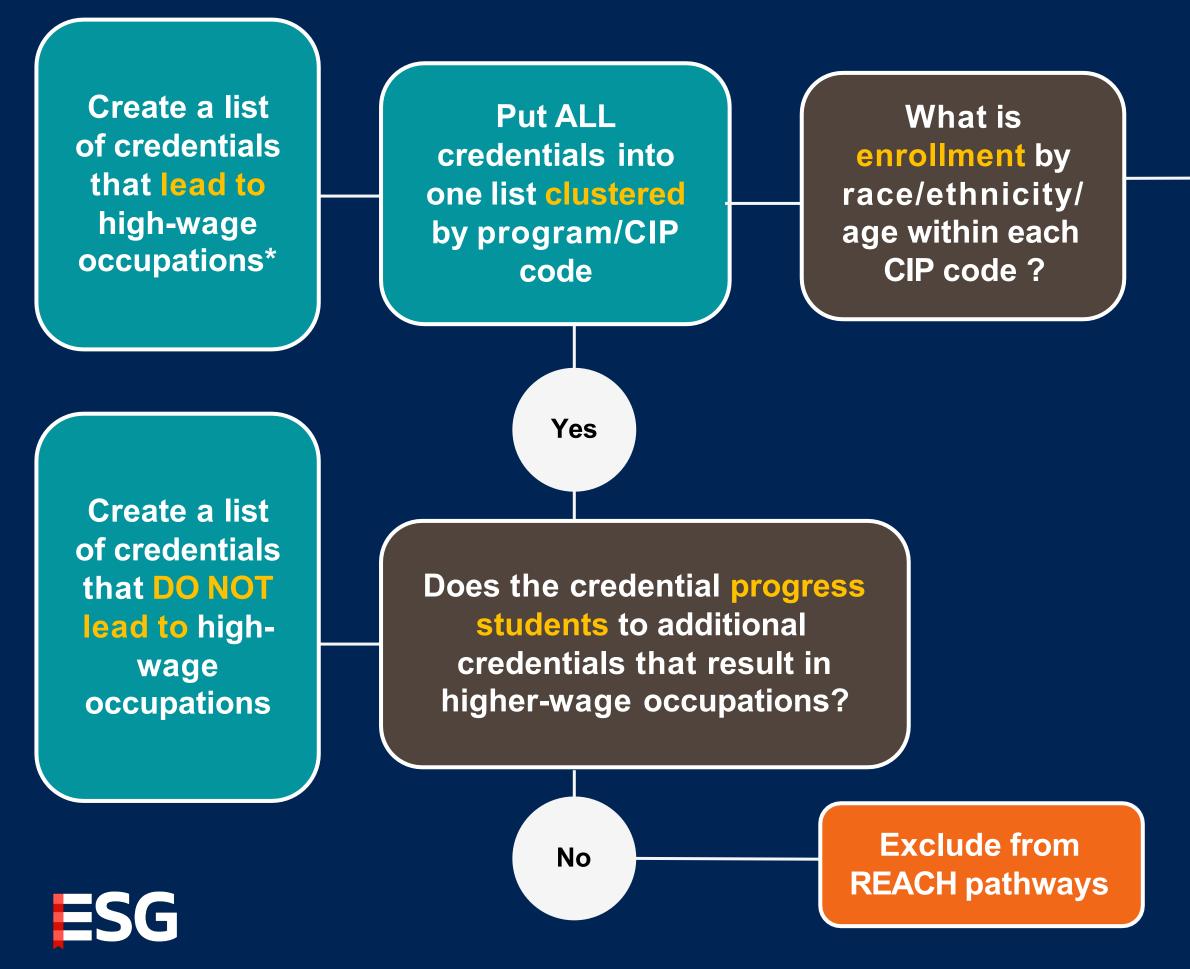

Non-degree credential: Body of coursework, validated by employers within the indemand, high-wage occupations, that signal the necessary skills and expertise for hiring and can be demonstrated through an industry recognized credential or locally developed set of competencies.

Narrow the list to identify 4-8 pathways

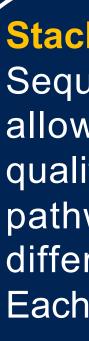

What are institution- or regionspecific contextual factors?

> Narrow list to identify 4-8 pathways

*Consider using <u>crosswalk</u> from occupation SOC to CIP

Does the credential progress students to additional credentials that result in higher-wage occupations?

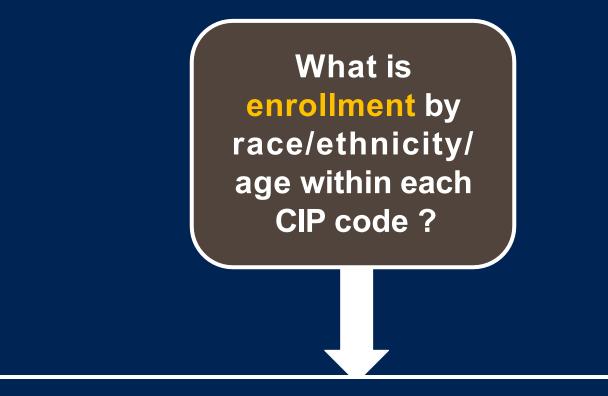

•

Stackable credential programs: Sequential mapping of credentials that allow individuals to build their qualifications and progress on a career pathway or up a career ladder to different and likely higher-paying jobs. Each credential in the "stack":

- Has a shorter duration than associate degree
- Has labor market value by itself, thus adding to student's earning power
- Should be part of a structured progression that provides a clear pathway over multiple awards to completion of a degree (without losing credits from earlier credentials)

Adult learner: (other common terms: post-traditional, non-traditional, and adult students). Students age 25+ who are enrolled in credit, noncredit, and not-for-credit programs

- at community colleges or at adult schools.
- Age acts as a proxy to capture a large and diverse population of adult students \bullet whose life circumstances--attending part-time, working, having dependents, not having a high school diploma--can interfere with successful completion of educational objectives

(Bean & Metzner, 1985; Cleveland-Innes, 1995; Hurtado, Kurotsuchi, & Sharp, 1996).

Our Role within REACH

Equity Level Setting: A Precursor to Culturally Sustaining Practices

- Equity Mindedness (Bensimon, 2018; Bensimon & Gray, 2020)
- Racial Consciousness (Banton, 1997; Peller, 1990)
- Equity Conscious (Zamani-Gallaher, 2020)

Our Role within REACH

What are Culturally Sustaining Practices?

- Culturally Sustaining Practices support learning, elevate student performance, and foster critical consciousness in culturally competent manners that affirm and preserve cultures (e.g., culturally diverse and multilingual competencies) (Paris & Alim, 2017).
- Culturally Sustaining Credentialing Pathways "reflect explicit race conscious policies, programs, and practices that actively address racialized inequities to ensure student access and success. As such, these pathways are not race avoidant or ignore ethnicity but rather engage at an individual, system, and structural level to interrogate and ameliorate inequitable experiences and outcomes among racially minoritized students" (Zamani-Gallaher, 2021).

Poll Question 2: Culturally sustaining practices in community colleges must encompass what in your opinion?

Education Strategy Group

What we heard from our ECCs

On Culturally Sustaining Practices

•Codified commitments with bullets on the institution's strategic plan, scorecard and seamless intended, woven and measured from EVERY unit on the campus.

•An equity-centered approach to decision-making and policy setting, restructuring to have a student and equity designed organizational and administrative process structure

- •Taking an anti-racism approach to hiring practices, on-boarding, and critical pedagogy.
- •Cultural continuity, particularly amongst Latinx and Indigenous groups in the state.

•Must have long term resources and commitment from campus leadership in various college wide initiatives (strategic plan, values, data disaggregation).

What We Heard from Our ECCs

On Culturally Sustaining Practices

•More PD to get a shared meaning among community college stakeholders

•CSPs must include partnerships among all divisions of the community college--administration, student life, financial aid, mental health services, library, public safety, marketing, and the curriculum. There should be conversations about how each division contributes to cultural sustaining practices.

•Ongoing interrogation of institutional policies and practices through equity and race conscious lens

•They must be grounded in community cultural wealth and reject deficit notions of students, families, and communities.

•A sense of deep care (cari`no) and a holistic approach so we are supporting the whole human in successfully completing our pathway.

Education Strategy

What we heard from our ECCs

Areas of TA/PD

 Integrating culturally sustaining pedagogy and supports

•Using tools established

REACH

collaborative

 Addressing issues of historical legacy of white supremacy, whiteness, and anti-racism

 Connecting accountability to professional development

Teaching from other cultural perspectives

Education Strategy

- •A focus on cultural humility
- •Engaging faculty as leaders
- •Operationalizing practice in attempts to build anti-racist or racially conscious colleges
- Decoupling culturally sustaining practices and campus climate from political pressures
- •Continuing to center racial equity, often talk in general terms because folks are resistant, scared of, talking about race

What appears to be a path to some appears to be a barrier to others. When you take the first step, the rest of the pathway may appear...

"Individual learning and commitment to antiracism is necessary; however, there must also be a commitment at the systemic level to ensure that not only are individual educators adopting and working toward anti-racism, but that the entire organization is constantly working toward it as well." (Welton, Owens, and Zamani-Gallaher, 2018, p. 5)

"However, research on anti-racism in education mostly centers on classroom teaching, preparing educators to be anti-racist and the resistance and politics involved in doing the work; limited research provides concrete strategies and examples of how to invoke anti-racist change system-wide." (Welton, Owens, & Zamani-Gallaher, 2018, p. 6)

• There is no one right way to do this work. Easily distracted and not keeping focus on racially minoritized adult learners

Education Strategy

"Therefore, for long-term, continuous change to occur it needs to be transformational, which is change that is widespread throughout the institution." (Welton, Owens, & Zamani-Gallaher, 2018, p. 6)
